

CEWELD NiCrCo 617

TYPE	Nickel based alloy with high heat resistance combined with excelent mechanical strength									
ANWENDUNGEN	CEWELD NiCrCo 617 is a high temperature alloy which is used for welding of nickel-chromium-cobalt-molybdenum alloys (UNS Number N06617). This filler metal can also be used for overlay cladding where similar alloy is required such as gasturbines and ethylene equipment.									
EIGENSCHAFTEN	Weld metal provides optimum strength and oxidation resistance above 815 °C (1500°F) up to 1149 °C (2100°F), especially when welding on base metals of nickel-iron-chromium alloys.
